- [Installation](#)
 - [Download JAR](#)
- [Links](#)
- [License](#)

Summary

Allows to comfortably configure vanity URLs like www.magnolia-cms.com/xmas, without requiring the user to have write-access to the config workspace. Also creates QR codes, which can be used for offline sharing and mobile testing.

Screenshots

Installation

For further information see <https://github.com/aperto/magnolia-vanity-url>

Download JAR

For Magnolia 5.4.x and 5.5.x: [Download from Nexus](#)

For Magnolia 5.6.x and 5.7.x: [Download from Nexus](#)
