

CMIS Server module

- [Requirements](#)
- [Tasks](#)
 - [Update the 4.5 implementation](#)
 - [Rename GIT module](#)
- [Good 2 know](#)
 - [Configure a workbench CMIS client](#)

Requirements

- Adapt the 4.5 CMIS server module in order to:
 - point to the new DAM workspace and uses Asset node type
 - uses the last Apache Chemistry Release 0.10.0
- Read and write operation has to stay (Read only operations are for Asset API only)

Tasks

Update the 4.5 implementation

The current CMIS module is now able to access DAM repository.

- Create/Read Folders
- Create/Read Assets

Implementation is pushed under: <https://git.magnolia-cms.com/gitweb/?p=modules/cmisis.git;a=shortlog;h=refs/heads/magnolia-module-cmis-2.0>

Rename GIT module

Rename the module (GIT/Module Descriptor/ Pom)

from: cmis module

to: cmis server module

Artifact

```
<groupId>info.magnolia.cmis</groupId>  
<artifactId>magnolia-cmis-server</artifactId>
```

Good 2 know

Configure a workbench CMIS client

- Upload and install [CMIS workbench](#)
- Once your Magnolia instance is started
 - run the workbench client
 - set : `http://localhost:8080/<webApp name>/magnolia/cmisisws/cmisis?wsdl` as entry point
