

# Ideas for possible components

Components can come in different flavors.

1. Magnolia only,
2. Wrapping JS/CSS libraries, or
3. wrapping web services.

Typically they provide editing via a Dialog.

It makes sense to offer additional customization - via:

- Template definition parameters.
- Site configuration.
- Other method? What about home page template?

## Magnolia Only

Basic

- Spacer
- HR
- Single page navigation
- List of child pages
- Download list
- Language picker
- Navigation
- Columns
- Related content
- Mega Menu
- Bread crumbs
- Testimonials

## Wrapping JS/CSS libraries

CSS frameworks

- Bootstrap
- Foundation

Dynamic

- Tabs
- Accordion
- Responsive Image
- Ad Rotator
- Carousel
- Slideshow
- Gallery
- Calendar
- Scheduler
- Codeblock
- Charts & graphs
  - <http://www.chartjs.org/>
- Scroll effects
- Animation
- Block layout
- Notification

# Wrapping web services

## Services - Social

- Social sharing - AddThis ShareThis etc
- Twitter stream
- Twitter tweet
- Facebook feed
- Linked in
- Pinterest board
- Instagram
- Commenting
  - **Disqus**
- Q&A
  - Pubble

## 3rd Party Services

- Map
  - Map with pins
  - Store locator
- Video
  - Youtube
  - Vimeo
  - Dailymotion
- Audio
  - Soundcloud
  - Bandcamp
  - Mixcloud
- Forms
  - Wufoo
  - Google forms
- Code
  - Codepen
  - Github
  - npm component lister.
- Images
  - Flickr
  - Getty Images (free) <http://www.gettyimages.de/resources/embed>
- Calendar
  - Google calendar
  - OpenTable
  - BookingBug
- Google Charts
- Slideshare
- Stock ticker
- Weather widget - Accuweather
- Tripadvisor
- Content things: Outbrain

## Money

- Advertisements
  - Google Adsense
  - BuySellAds
  - Chitika
- Affiliate programs
  - Amazon Associates
- Donation
  - Paypal donation
  - Amazon payments
  - Patreon
  - Google Wallet
- Ecommerce
  - Gumroad

#### Search

- Google
- Swiftype

#### Advanced website

- Chat
  - **Olar**
  - Userlike
- Feedback

#### CRM / Marketing automation

- Contact form
- Email signup
  - **Mailchimp**
