Installing

Maven is the easiest way to install the module.

```
<dependency>
  <groupId>info.magnolia.ui</groupId>
  <artifactId>magnolia-ui-color-picker-field</artifactId>
  <version>1.1.1</version> <!-- Magnolia 6.2 -->
</dependency>
```

Source Code

The source for this module can be found here: <https://github.com/magnolia-community/color-picker-field>

Issues, Bugs and Improvements

Report them here: <https://github.com/magnolia-community/color-picker-field/issues>

Configuration

Simply configure the color picker as a field in your dialog or app:

```
/my-module/dialogs/color-picker-example.yaml
```

```
form:
  properties:
    color:
      $type: colorPickerField
      label: Color Picker
```

Known Issues

- Closing the dialog (i.e. Save and Cancel) does not automatically close the color picker. You must pick the color, click "OK" and then Save.
- In version 1.0, the "name" of the color picker must be "color". Limited to one picker per form. (⚠️ fixed in v.1.1)
- Unable to clear color picker selection, or select transparent color.
 - <https://github.com/magnolia-community/color-picker-field/issues/3>

Changelog

- v1.1.1
 - Fixed modal bug.
 - <https://github.com/magnolia-community/color-picker-field/issues/2>
- v1.1
 - Updated for 6.2.
 - <https://github.com/magnolia-community/color-picker-field/pull/1>
 - Solved restriction of field naming.
- v1.0
 - Released for 6.1
