

# External DAM - Aprimo

Extending the existing external dams module: <https://git.magnolia-cms.com/projects/ADDON/repos/external-dams/browse>

Code: <https://git.magnolia-cms.com/users/Istaniorski/repos/dam-external-aprimo/browse>

Add these credentials to your Magnolia instance in the [Password manager app](#). For example:

aprimo-credentials	
	 client_id
	 client_secret

## Configuring the module

### dam-s3/config.yaml

aprimoDamBaseURL: <https://sanofi.dam.aprimo.com>

Property	Description
aprimoDamBaseURL	<b>required</b> The DAM base URL of the Aprimo instance in question

aprimoBaseURL: <https://sanofi.aprimo.com>

Property	Description
aprimoBaseURL	<b>required</b> The base URL of the Aprimo instance in question

Limitations:

-only using READ

-add in search functionality to chooser and within app

-versions of the images need to be ordered

Aprimo will be adding:

1. The ability to configure rules in the DAM push assets out to the CDN under certain conditions (i.e. an asset is tagged with 'approved' and 'eligible for magnolia').
2. The ability to synchronously pull these urls from the API, or the ability to leverage our [content selector](#) to return a CDN URL instead of an id.
