

# Resetting password to AdminCentral

## Step-by-step guide

1. Log in to Magnolia using an account which has rights to open the "Security" app.
2. Double click the user's name in the "Users" tab.
3. Create and confirm a new password for the user.
4. Inform the user that the password can be changed via the "Edit user profile" item in the menu that pulls down after clicking the username in the top right corner.
