

Datadog - Updating user settings

Datadog tool allows the users to individually change their settings to their needs. You can for example choose whether you want to receive emails with reports, digests, or other notifications.

Step-by-step guide

1. Login to the Datadog.
2. Click the icon at the very bottom of the gray panel on the left side. (The icon with your user name.)
3. Choose "Settings".
4. On the "My Settings" page that opens, go to the "Preferences" tab.
5. Choose what reports, digests, or other notifications you want to receive.
