

# Reset all passwords

✱

Your Rating:  Results:  124 rates

Here's a Groovy script to reset all the passwords in our database to "". We used this when we went from Magnolia's native authentication to using LDAP.

```
import info.magnolia.jcr.util.NodeUtil
import info.magnolia.jcr.predicate.NodeTypePredicate
import info.magnolia.jcr.util.NodeTypes
session = ctx.getJCRSession("users")
users = NodeUtil.collectAllChildren(session.rootNode, new NodeTypePredicate(NodeTypes.User.NAME))
int count = 0
users.each() {
    if (it.name != "anonymous" && it.name != "superuser" ) {
        it.setProperty("pswd", "")
        it.save()
        count++
    }
}
println("Reset password for " + count + " users.")
println("Passwords for user \"anonymous\" and \"superuser\" remain unchanged.")
```
