

Unconference 2014

There is a subpage for each 2014 unconference session.

These pages contain notes and a brief summary of what was discussed in the unconference sessions.

Now the conversations continue. Everyone (Magnolia employee or not) is invited to edit the pages or add comments.

- [Unconference 2014: 5.4 Roadmap - Frontend Dev, and more](#)
- [Unconference 2014: Config App - Autosuggest, Autocomplete & more](#)
